

*Important News for People with
Chronic Moderate to Severe*
Psoriasis

Do you currently have moderate to severe psoriasis - thickened patches of red inflamed skin covered with a silvery white buildup of dead skin cells or “scales” that can be itchy, painful and may crack or bleed?

Charlottesville Dermatology in Charlottesville is conducting a research study of an investigational medication for adults with moderate to severe psoriasis.

Qualified participants will receive:

- Study-related care
- Study-related medication at no cost

Participants may be compensated for their time and health insurance is not needed.
